AI FUNDAMENTALS

Foundations for Understanding AI

IBM SkillsBuild — Certificate of Completion

A presentation of the certificate, course overview, and foundational AI learning outcomes.

Certificate Recipient

ISSUED TO

ABINRAJ CHOVULLAKANDY

Issued on: 15 October 2026

Issued by: IBM SkillsBuild

Credential Details

Course: AI Fundamentals: Foundations for Understanding AI

Provider: IBM SkillsBuild

Format: Digital badge / certificate

Credential ID: PLAN-56705048DB3F

About the Course

A foundational program introducing core concepts of Artificial Intelligence — what AI is, how it works, where it is used, and why it matters.

WHAT AI IS Core concepts and terminology	**HOW AI WORKS** Learning from data and patterns
WHERE AI IS USED Applications across real-world settings	**WHY IT MATTERS** Ethical and societal considerations

Key Topics

- What Artificial Intelligence is — and is not
- How AI systems learn from data
- Machine learning basics
- Real-world AI applications
- Ethical considerations in AI
- AI's impact on work and society

Skills Gained

- ✓ AI literacy and core terminology
- ✓ Understanding of machine learning and data-driven systems
- ✓ Awareness of AI ethics and responsible use
- ✓ Identifying AI applications across industries

These are foundational learning outcomes summarized for this presentation.

Why This Certificate Matters

- Issued by IBM SkillsBuild
- Credential can be verified through Credly
- Demonstrates foundational knowledge of AI concepts
- Supports continued learning and career development

Certificate Verification

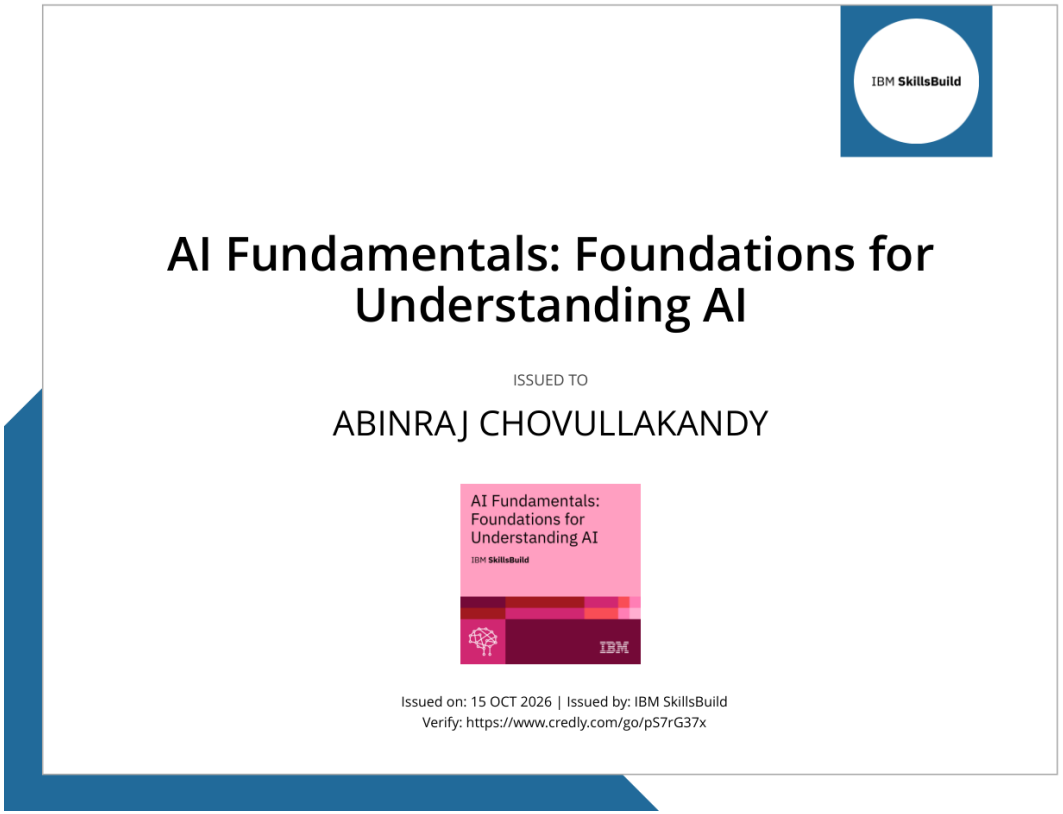

The certificate provides an online verification link through Credly.
